

ABSTRACT

Patient Safety Culture is fundamental in the implementation of patient safety in hospitals. Patient safety incidents that occurred in Indonesia are known that there were 7,465 cases in 2019 in hospitals in Indonesia. According to the Agency for Health Care Research and Quality (AHRQ) (2016), assessing patient safety culture through three aspects, one of which is supervision. The purpose of this literature review study was to analyze the correlation of supervision factors to implementation of patient safety culture by nurses in hospitals using Literature review Study. The method used is a literature review study on relevant journals/articles. The results of this literature review is most of the journals/articles have been well rated by nurses and there is a significant correlation between supervision factors on the implementation of patient safety culture by nurses in hospitals. Conclusion: the implementation of supervision in the ten majority journals has been assessed as good by nurses and there is a correlation between supervision and the application of patient safety culture by nurses in hospitals.

Keywords: *Supervision, Patient Safety Cultur, Nurse*

ABSTRAK

Budaya Keselamatan pasien merupakan hal yang mendasar di dalam pelaksanaan keselamatan pasien di rumah sakit . Insiden keselamatan pasien yang terjadi di Indonesia diketahui bahwa terdapat 7.465 kasus pada tahun 2019 di rumah sakit di Indonesia. Menurut *Agency For Health Care Research and Quality (AHRQ)* (2016), menilai budaya keselamatan pasien melalui tiga aspek yang salah satunya yaitu supervisi. Tujuan dari penelitian *Literature Review* ini adalah untuk menganalisis hubungan faktor supervisi dalam pelaksanaan budaya keselamatan pasien oleh perawat di rumah sakit dengan menggunakan *Study Literature review*. Metode yang digunakan yaitu study literature review pada jurnal/artikel yang relevan. Hasil dari literature review ini sebagian besar jurnal/artikel telah dinilai dengan baik oleh perawat serta terdapat hubungan yang signifikan faktor supervisi terhadap pelaksanaan budaya keselamatan pasien oleh perawat di rumah sakit. Kesimpulan : penerapan supervise pada kesepuluh jurnal mayoritas telah dinilai baik oleh perawat serta terdapat hubungan antara supervise dengan penerapan budaya keselamatan pasien oleh perawat di rumah sakit.

Kata Kunci : Supervisi, Budaya Keselamatan Pasien
