

## **ABSTRACT**

*Wrong location, wrong procedure, wrong patient surgery, is a worrying and common occurrence in health care facilities. To prevent unwanted events in the operation, it is necessary to carry out several procedures such as site marking. Based on the data on Quality Improvement and Patient Safety Reports for TW I, TW II, and TW III RSPAL Dr. Ramelan Surabaya In 2021 the percentage of site marking achievement per TW has increased, but there is still a trend that increases and decreases every month. The total site marker achievement indicator in TW II is 100%. This type of research is analytic with a quantitative approach and cross sectional research design. The sample size in this study used Total Sampling. The data analysis used ordinal logistic regression. The results show that DPJP motivation affects compliance in filling out site markings with a significant value of  $0.07 < 0.05$ , meaning that there is an influence between DPJP motivation on compliance with site marking filling.*

**Keywords :** *Motivation, Compliance, Site Marking*

## ABSTRAK

Salah lokasi, salah prosedur, salah pasien operasi, adalah kejadian yang mengkhawatirkan dan biasa terjadi di fasilitas pelayanan kesehatan. Untuk mencegah kejadian yang tidak di inginkan dalam operasi, perlu dilakukan beberapa prosedur seperti *site marking*/ penandaan. Berdasarkan data Laporan Peningkatan Mutu Dan Keselamatan Pasien TW I, TW II, dan TW III RSPAL Dr. Ramelan Surabaya Tahun 2021 presentase capaian *site marking* per TW mengalami peningkatan akan tetapi masih ada trend tiap bulannya mengalami kenaikan dan penurunan. Untuk indikator capaian *Site Marker* total pada TW II ini yaitu sebesar 100%. Jenis penelitian analitik dengan pedekatan kuantitatif dan rancangan penelitian cross sectional. Besar sampel pada penelitian ini menggunakan *Total Sampling*. Analisis data tersebut menggunakan regresi logistik ordinal. Hasil menunjukkan bahwa Motivasi DPJP mempengaruhi Kepatuhan dalam pengisian *Site Marking* dengan nilai signifikan  $0.007 < 0.05$  artinya Ada Pengaruh antara Motivasi DPJP terhadap Kepatuhan Pengisian *Site Marking*.

**Kata kunci :** Motivasi, Kepatuhan, *Site Marking*
