

***ANALYSIS OF KNOWLEDGE AND ATTITUDES OF MEDICAL STAFF
(NURSES) TOWARDS STAFF ASSIGNMENTS ACCORDING TO
ACCREDITATION STANDARDS
IN WIYUNG SEJAHTERA HOSPITAL***

Anggita Fitriani

ABSTRACT

Hospitals are part of a health system that provides services to the community as health services that include promotive, preventive, curative, and rehabilitative services by providing inpatient, outpatient, and emergency services. Knowledge and attitudes of medical staff towards the implementation of hospital accreditation are important things that need to be considered to improve the quality of services in the hospital. The purpose of this study was to analyze the knowledge and attitudes of medical staff (nurses) in the inpatient room towards staff assignments according to accreditation standards at Wiyung Sejahtera Hospital. This study used a quantitative method with a cross-sectional research design using the Chi-Square test and the study sample size was 87 nurses. Sampling using inclusion criteria with the condition that the nursing staff did not include those in the ICU & IRC intensive room. The results showed that there was a relationship between knowledge and attitude towards staff assignment according to accreditation standards at Wiyung Sejahtera Hospital Surabaya (p value = 0.000) so that p -Value = 0.000 < α = 0.05.
