

**THE COLLABORATIVE RELATIONSHIP BETWEEN THE NURSING
TEAM AND PATIENT SAFETY INCIDENTS IN THE AZZARA 2 AND
MELATI ROOMS AT THE ISLAMIC HOSPITAL SURABAYA
JEMURSARI**

Fabilla Oktavineda

ABSTRACT

In the 2022 Monthly KPRS data, the number of IKP based on the type of incident reported to the KPRS subcommittee at the Surabaya Islamic Hospital Jemursari counted at most 14 incidents in January consisting of 4 incidents of KNC, 8 incidents of KTC and 2 incidents of KTD. This research was conducted to identify nurse teamwork, identify patient safety incidents and analyze the relationship between nurse teamwork and patient safety incidents.

This study used a quantitative method with a cross-sectional approach with data collection techniques through a questionnaire totaling 21 questions to 35 samples. The number of samples was determined from the total population of inpatient nurse Azzara 2 and Melati at the Surabaya Islamic Hospital Jemursari.

The test used the *statistical product and service solution* (SPSS) program version 24, the results of the Kendall's tau bivariate test showed a significance result of $0.000 > 0.05$, due to a significance of less than 0.05, there was a relationship between teamwork and patient safety incidents at Surabaya Islamic Hospital Jemursari.

Keywords: Nurse, teamwork, patient safety incident.

HUBUNGAN KERJASAMA TIM PERAWAT DENGAN INSIDEN KESELAMATAN PASIEN DI RUANG AZZARA 2 DAN MELATI RUMAH SAKIT ISLAM SURABAYA JEMURSARI
